THE STRONGEST AND BEST!

THOS. PRICE, Analytic Chemist, pronounces the GIANT BAKING POWDER nearly one-third stronger than any sold on the Pacific Coast.

The value of Baking Powder is determined by the amount of available gas it contains for baking purposes, and the freedom of the article from any injurious ingredients. The GIANT BAKING POWDER is absolutely pure, and contains moregas than any brand of Baking Powder in use on this Coast. Three cans of GIANT BAKING POWDER are equal to four cans of any other brand. Study economy and use none other. Your grocer will furnish you with a sample can free. Try it. FACTS.

EOTHIN MFG. CO.,
GENTLEMEN: The sample of GIANT BAKING
POWDER you handed me, also samples of the
following brands of Baking Powders purchased
by me in open market, I have tested for total
quantity of available gas, with results as follows:

CIANT, 196 cubic inches per ounce avoirdupois NEW ENGLAND, 110 cubic inches. PIONEER, 107 cubic inches. GOLDEN GATE, 107 cubic inches

OR. PRICE'S, 90 cubic inches.

Yours, respectfully, THOMAS PRICE, Chemist. SAN FRANDSCO, Sept. 24, 1883.

H. E. BOTHIN, President Bothin Mig. Co.
DEAR SIR: After a careful and complete chemical analysis of a can of GIANT BAKING POW.
DER, purchased by us in open market, we find that it does now contain alum, acid phosphate, terra alba, or any other injurious substance, but is a pure, healthful Cream Tartar Baking Powder, and as such can recommend it to consumers.
Yours, respectfully,

THE VETERANS. Interesting Sessions in the City and a Visit to the Home.

The Grand Encampment of the Grand Army of the Republic, Department of California, convened in its seventeenth annual session at one o'clock last Wednesday afternoon, in the hall of Lincoln Post, No. 2, in San Francisco. It was called to order by J. W. Staples, Department mander, and on a call of the ros-

er all the Grand Officers were found present, with the exception of A. G. Bennett, Junior Vice-Commander. The Assistant Adjutant General, Horace Wilson, reported forty-three Posts of the Department entitled to 216 delegates, and of these 150 answered their names. There were also present a number of visiting comrades, many coming from remote places in the State. Among other reports made there was one from the Assistant Adjutant General showing that there had been a gain of three new Posts during the past year, and that another one had been mustered in since January 1st of the present year. In membership the net gain has been the several Posts for relief has been \$1,526,in the interest of some seventywhom six only were members. These latter received \$131.25 and others the sum of \$559. Another and more im-

portant report was submitted by the Directors of THE VETERANS' HOME. This report was quite .voluminous, In addition it set forth that at a meeting of the Directors held December 1883, a resolution was unan-imously adopted to the effect that each member of the Board should tender his resignation prior to the seventeenth annual session of the Grand Encampment, and requesting the latter body to fill the positions thus made vacant. In pursuance of such resolution this action was now reported and the Encampment requested to select qualified persons to fill such positions and to fix the tenure of office of the new Directors.

The term of office of these Directors was fixed by the fifteenth annual Encampment as for life. This tenure the outgoing Board believed to be wrong in theory and practice, because it created an outside dissatisfaction in

possession of the property. Plans for the buildings were advertised for, and those of McDougall & Son were accepted on December 30, 1882. These plans called for the expenditure of more money than was then on hand, Boot and Shoe Manufacturing Comconsequently contracts were let for the erection of only a portion of the main buildings, at a cost of \$15,670. Atter that the water supply question was considered and the present system was considered and the present system adopted. When the purchase was made the land had on it a thirty-acre vine-yard one year old, and since then the

association has added forty-five more acres of vineyard to the tract. The total expenses around the place, including the care and setting out of the new vineyards, have been \$1,380. The Board of Directors have elected as Superintendent of the Home Col E. P. Wood, who is to receive no compensation until the Home is opened

and then only such salary as may be fixed by the Board of Directors. In conclusion more funds were reported necessary for the purpose of carrying out the objects of the association. This report was accepted and referred to the following committee: John Lynch of Thomas Post, No. 2, (Chairman); Wyman Murphy, Ellsworth Post, No. 20; Thomas A Wilson, Lincoln Post, No. 1; H. Barrbour, Dix Post, No. 42; P. C. Moore

bour, Dix Post, No. 42; P. C. Moore, Starr King Post, No. 52. the total receipts to have been \$38.

The report of the Secretary showed 801.64; total disbursements, \$38,593.11; balance on hand, \$208.53. Assets, 910 acres of land at Yountville, a new two-story building on the land, also an old two-story frame building, with out-houses and a barn, grain, wood,

THE EXCURSION. At the close of Wednesday's session an adjournment was taken to Friday morning, that delegates might join in Thursday's excursion to the Home near Yountville .- Accordingly, the next morning a company of ex-soldiers and their wives, about one bundred and fifty in number, left Market street wharf for Napa Valley. The excursionists arrived at the Home without accident at about 12 and discussing the imposing pile intended for the shelter of needy and infirm veterans and the large and valuable property of which it is only a small part. They discussed nothing to the shape of cold chicken, sandwhes, or fruit of the vine; however, hosespeed of an ambuved migrapher. of an awkward misunderstanding in arranging a program for the day. Grand Commander J. W. Staples in announcing the excursi the evening before suggested the idea of taking a little "hard tack" along to brace up the inner man with in case of an emergency, but some one arose and said that a collation was being prepared and would be in readiness upon their arrival at the Home, and so the pic-nic feature of the excursion was not farther entertained. The promisknew by experience what it was to and real danger. hunger and thirst, would have come

posing their party to fast all day, and so the hotels of Yountville were be-sieged, and during their short stay

hould not have been so, and was the result of bad management, but the verdict of "nobody in particular to blame" is the one the boys were disposed to agree upon, and probably no investigation will be instituted.

with authority to call for books and Among the visitors present were J.
W. Staples, Com. Dept. of California;
R. H. Warfield, Senior Vice-Commander; J. C. Tucker, Medical Director; O. B. Culver, Assistant Quar-termaster General; Messrs. Smart, Sheehan and Houghton; of the Veterans' Home Association, and Messrs. Lynch, Murphy and Moore, of the Committee to whom was referred the

Veterans' Home report.

The building erected by the Veterans' Home Association on their prop erty near Yountville will probably be used as a dormitory and the old dwelling will be made to serve as a kitchen and laundry, thus doing away with the necessity of more buildings, excepting those in the shape of cottages until funds are more abundant.

We have seen larger skirmish lines but none more desperate than that which deployed in front of the Veterans' Home Thursday with orders to go forward and not stop until a genmembership the net gain has been some 800. The amount expended by a head) had been brought on.

At the morning session of the G. A. R. in San Francisco Friday a vote of thanks was given to G. Groezinger of five persons, all but twenty of whom were members of the order. The Detailties to the members of the Enpartment Bureau of Relief paid out campment on the occasion of the re-\$690.25 for assistance to persons, of cent visit to the locality of the Veterans' Home.
The Committee on Veterans' Home

reported that they had carefully examined the financial statement of the association, also the books, and found them correct and the books properly kept; that they had made a personal examination of the grounds reviewing as it did the transactions of the Veterans Home, the Association since its organization. estly expended the money placed in their trust and that the property now in their possession was fully worth all it has cost the association.

A preamble and resolution authorizing the Veterans' Home Association to mortgage the property for \$15,000

A TERRIBLE DISASTER.

A terrible explosion, which occurred at Crested Buttes, Gunnison county, Colorado, at seven o'clock Thursday morning in the Crested Buttes coal mine, was one of the most appalling that ever occurred in a coal mine in this country. Crested Buttes, near which the mine is located, is a coal mining town thirty miles north of Gunnison City, on the Denver and Rio Grand Railroad. The cause of the explosion is not yet definitely known, but is supposed to have been fire-damp. The explosion occurred just half an hour after the day force of 67 men had gone to work. There were 10 men at work in chamber 4 and these all escaped unhurt except Market street wharf for Napa Valley. The excursionists arrived at the Home without accident at about 12 and is badly burned, but will recover. Fifty-seven men were at work in chambers 1 and 2. These, it is and discussing the imposing pile inthought, have all perished. The explosion was of such force as to comletely barricade the main entrance and appliances for supplying air, lo-cated near by, were badly wrecked and the roof of the tramway blown off. The men at work on the Anthracite Mesa mine, the night force of the Colorado Coal and Iron Company's Colorado Coat and Thon Company mine and citizens generally were working hard all day to rescue the men, although it is thought none can possibly escape alive. The Town possibly escape alive. The Town Hall was prepared for the reception of the dead. As soon as possible the fan was repaired and put to work pumping air into the mine, and men were set to work to remove the obstructions so as to reach the cham-bers and get the bodies out as soon as possible. The mine has long been considered dangerous by those ac quainted with it. While one of the best producing mines of the country its operation has always been attend ed with more or less apprehensio

seventy-five or more of the visitors obtained meals gotten up on short order, with the Veterans' inhospitable Home one and a half miles away. It

Cutting up the Farms.

One of the best judications of the small tracts. While in the mountain regions, where the ground is used principally for grazing, the large holdings have increased in number in the past few years, in the valley, where by far the greater portion of the county's products are raised, the number of small holdings is constantly increasing. Where, a few years ago, were to be found ranches of from 200 to 600 and 1,000 acres, devoted princi-

pally to wheat raising, with here and there a small orchard or vineyard, now will be found hundreds of homes each with its orchard or vineyard, or both. County Assessor Kean says that an astonishing number of transfers and subdivisions are being made, and where, as formerly, his map work was an unimportant item, now, to keep the locations correctly plotted, requires a great deal of labor. In this connection, it might be remarked, that the work of the Assessor's field deputies discloses the fact that a large percentage of land owners da not know the boundaries of their land, and, in the case of government land, many cannot give the township and range number. In many of the deeds filed for record the descriptions are so blindly given, that no one, not preto find out the boundaries of their

The Feeble Minded: The latest report from those canvassing for the proposed Home for Feeble Minded Children gives \$14,000 as the amount in bank and several for the purpose of completing the same, was voted down by an overwhelming majority.

we shall plant. Reds, claret, Burgundy and port, are the wines we have to make in larger proportions than white supply. wine, when we sell to England or France; in fact, claret is the wine of America, England and France. To Tuesday for petty larceny, was make, then, the best claret is the immulcted in the sum of five dollars, portant problem. California, up to this time has made its claret from Mission, Malvoisie and Zinfandel, as a rule. In fact, nine-tenths of all the claret made now in this State is pro-duced from Zinfandel, and it is much superior to the other two, and has done a noble work, making a wine which will compare very favorably with the ordinary wines of Europe. Yet I think that there are other grapes which make a wine that is a great improvement on Zinfandel. In fact, i is hard to find a Zinfandel which is wine of the first quality. As a rule it has too much acid. It is not smooth enough for the general taste, and that improvements can be found in other varieties is certain. Nor do I speak of the Zinfandel of Southern California only, for we make Zinfandel here of fair average quality. I speak about it as I have seen it in cellars in San the best butter, will do well-to pat-Francisco, Napa and other localities in this State. I buy wine as well as make it. We have bought wines and do so yearly from the northern cellars, wherever we could find what suited

Sheffler's cellar at St. Helena, which we bought and it was suited to our requirements and has given satisfac-tion to the buyer. This he called Carignan, but it was understood at the ignan, but it was understood at the time that it was a blend of two or more kinds. What these blends were I have not learned. We also found small lots of wine at Mr. H. W. Crabb's, Oakville, which were very fine, consisting of Malbec, Pied de Perdrix, Gamay, Teinturier, Lenoir and Petit Pinot. The first four are wines of intense color and wines that wines of intense color and wines that would be desirable and salable in any market in Europe to be used as blends, and many such wines would now sell in this State at a high price, to blend with lighter colored wines to give color, and no one can go wrong in planting largely of all or any of these varieties. The Petit Pinot these varieties. The Petit Pinot makes a very nice wine, of better quality than Zinfandel. At Mr. theory and practice, the practice, and the practice, theory and practice, the practice, and the practice, theory and practice, the practice, the practice, and the perhaps for a red wine of a Burgundy type it has no superior. I saw, too, a sample of Sultana wine at Mr. Crabb's, a very nice wine indeed, and that grape is the heaviest bearer of all grapes, except the Burger, perhaps, which may be its equal. Burger in avorable warm localities, makes a wine which will hold its own against

all comers and will be especially val-uable as a base for blending, A Family Jar.

About four o'clock Tuesday afteroon a ripple of excitement was causd by the novel sight of a man being hased out of the Europa House and up Oak Avenue, by a woman, carrying in her hand a heavy stick of wood. The man was evidently in mortal terror of the irate female, for he ran like "streaked lightning" up as far as the school house, where he succeeded in dodging back and retracing his hurried steps to the Wm. Tell Hotel which he entered, closely followed by the woman and the stick of wood. The street parade was repeated a little later, the hilarious couple, going down Main street, and counter-marching, in double quick time-the man always in the lead. At train time in the evening, they were at the depot and indulged in a lively fight, whereupon Marshal Spurr took them into custody, and brought them before his honor, Judge Elgin. They claimed to be man and wife, named Barque, strangers in town, and the woman said her "old man" had taken \$10 from paid, and marched off leading her hen-pecked husband by the ear .-

Killing the Enemies of Game. The game-laws are intended to prevent the wanton destruction of game, and to facilitate its increase by securing it from disturbance or destruction during the period in which the young are produced. The law, however, is only-and but partially-effective against human marauders, while the natural enemies are generally suffered to prey upon game undisturbed. In Sonoma county, however, the sportsmen are determined to thin out these wild workers of destruction, and hence, according to the Courier, the Petaluma Sportsman's Club will have a hunt on the 2nd 3rd and 4th of February, for the purpose of making war on all enemies of game birds. The following values have been given the game to be hunted: Bluejay, 5 of fown, brings us an eighteen foot points; sparrow-nawk, 7; all other grape cutting, and has many from hawks, 25; crow, 10; eagle, 100; coon, 30; fox, 50; wildcat, 30; coyote, 100. The lunter scoring the most points will receive a cash prize of \$10; the second highest \$6; third, \$4. There are several species of hawks that live almost entirely on quail. They are the most expert hunters, One quail for breakfast, another for supper for breaklast, another for supper—
two quall a day; and it is very easy to
see how one hawk would dispose of
700 quall a year, or as many as the
whole Sportsman's Club would kill in
a seeson

Napa Asylum, was returned to that institution Monday by Officer McGee who found him in Conn Valley. The Oat Hill Quicksilver mines, also the Phoenix, Star and Washington, are kept running day and night—Sundays all the same. The regular whistle of the engines and the continual pounding of the compressed air drill with occasional blasts are heard many miles among mountains and valley. It gives a tone of activity and business stir to the otherwise, quiet phase of the surroundings. We hear that the Star and Washington mines have been taking out some very rich ore lately. Their some very rich ore lately. Their shipments for the present half month

amounted to about 229 flasks. John Thomann is shipping nearly 18,000 gallons of brandy from the bonded warehouse here to San Francisco. The lot is contained in 452 packages, of which 282 will be shipped at once and the balance some time next week. The government tax on this will amount to the nice little sum of about \$16,000. There are other lots in the warehouse which have been there nearly the allotted time of storage—three years—and preparations are being made to ship it. A lot of 28 packages of Scheffler's brandy, the property of A. Haraszthy & Co., which has been in storage three years, was shipped to San Francisco early this week.
